

Secure your infrastructure, reduce your risk, improve resiliency.

And protect your company's reputation.

In order to relieve the burden of information security and compliance and to meet your strategic goals, enhancements to your existing security program, infrastructure, and personnel may be needed. Essextec's flexible Managed Security Services provide protection across your networks and safeguard your critical internal assets, sensitive data, customers, remote users, and the integrity of your physical perimeter. With Essextec, you'll feel confident you're demonstrating compliance with GLBA, SOX, HIPAA, FISMA, NERC CIP, ISO 27001/27002, and more.

As a strategic IBM Managed Services Provider, we are able to provide you with leading industry tools and technologies to improve your security posture. You'll have the infrastructure and technical support to:

- > Secure your information assets 24/7/365
- > Mitigate risk
- > Lower your total cost of ownership for the monitoring and management of your security operations
- > Protect your company's reputation

There is no one size fits all security solution. Our team of specialists will design and implement custom, scalable solutions unique to your environment - regardless of your company size. We are focused on identifying vulnerabilities, assessing and improving administrative and technical controls, and mitigating risk so you can protect your organization and its critical assets.

Find out how Essextec can complement your current security efforts and personnel with 24/7/365 Managed Security Services. Visit essextec.com/mss, email us at exceed@essextec.com or call us at 1-888-519-1518.

Our Key Offerings

Firewall Management assures that your firewall infrastructure is monitored 24/7/365 to detect and respond to threats before they become a problem.

Vulnerability Management combines managed scanning services with expert workflow and case management to protect your network infrastructure from intrusions that could potentially damage your business - and your reputation.

Security Incident & Event Management help you compile event and log files from all of your security technologies, network applications, and operating systems into one, seamless platform.

Mobile Security not only helps you manage the security of your devices, but we'll also help you save money by enabling your employees to be productive using personal devices for secure access of corporate resources.

Application Security, customized security intelligence that will help improve your security strategy and develop sound policies for Internet access and usage.

Intrusion Detection and Prevention provides comprehensive protection for your network and servers, helping to block threats and unauthorized access from both internal and external sources.
