

# At a time when data center demands are out of control, **VersaStack puts you in control.**

With the demands on data centers increasing at an unprecedented level, enterprises today are looking to manage growth while controlling costs. To accomplish this, they must speed the deployment of applications and be able to adapt quickly as their needs change.

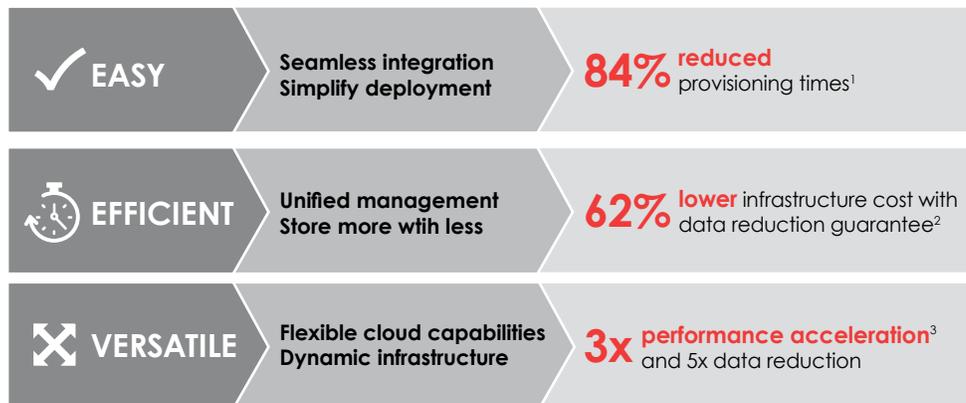

## VersaStack lets you accelerate the deployment of your IT infrastructure quickly and easily.

It lets you automate and provision applications so you can react to business realities and competitive demands more efficiently. And in the process, you'll reduce costs through better management of information and resources.

## One integrated solution from two industry leaders.

The VersaStack solution combines the innovation of Cisco UCS Integrated Infrastructure with the efficiency of the IBM Storwize storage system, allowing your IT team to build, deploy, secure and maintain applications through a more agile framework. VersaStack addresses the entire spectrum of data center workloads, everything from cloud to big data and analytics to on-site virtualization.

## VersaStack saves you more than money.
