

# Unleash the Value from your IBM i Using Microsoft Power BI

Introducing Essextec Cloud Analytics Extension (CAE), a solution that easily allows enterprises to connect their IBM i legacy environments to Microsoft business intelligence tools. Using CAE, MS Power BI can act as a front-end to data that lives on the IBM Power platform.

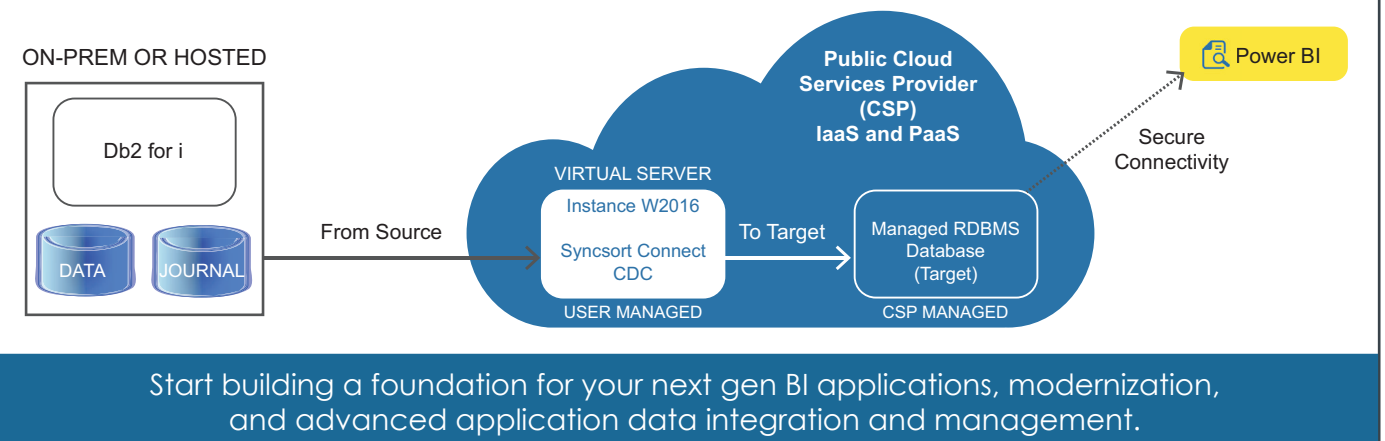

Imagine having options beyond RPG and the ability to write applications in modern languages such as Python, JavaScript, and others that will allow you to unleash greater value from your IBM i environment.

## Essextec Cloud Analytics Extension Solution

### BENEFITS

- > Cloud agnostic
- > Powered by Syncsort Connect CDC
